

LIKED (VERY MUCH)

- very practical, hands-on
- introducing very useful tools I did not know before

DISLIKED

- the schedule did not work out for me, but this is hard for the organizers to improve

All the material was really useful and the workshop was great. **THANKS!**

+ I learned the most by doing

+ Introduction to git, jupyter, travis CI and coverall have been useful, since I've never heard of those before

- Very long sessions

GREAT ☺

These kinds of courses are actually useful. Also personnel training.

Thanks a lot ☺
