Does

+ github.io, RTD
- Too little time

Documentation

+ more examples
  and followable
  pace.

DOC

- VÄHÄN HIMAANLÄMTÄ

+ MATERIAALI
  OLI SELKEETÄ

Documentation

* It would be great if
  you can have another
  full session for these
  topics, because all of them
  are useful and pretty new
  to everyone

Documentation

+ learnt about documenting
  project work

- would have been great to
  have more time

Documentation.
Easy to follow

DOCUMENTATION

+ GOOD MATERIAL AND
  DETAILED EXPLANATIONS

- SHOW MORE
  EXAMPLES

Automated testing

+ super interesting
  exercise!

- why did we have
  to go to coverall...??

DOCUMENTATION

Good topic and exercises were clear but there were many involved (?) roles so I'm a little disoriented now about which one to use

Doc session

Interesting session

The pace was way too high to keep up.

Code documentation

+ VERY USEFUL

≠ When you write comments in code e.g. above functions how they could automatically end into functions

DOCUMENTATION

+ super interesting!

- for me, the pace was a bit too fast

Documentation

+ again super useful information

-

✓: Clear introduction to Sphinx and read-the-docs

Improve: Do some example with some actual code, e.g., Using some real project.

[DOCS]

CODE DOCUMENTATION

It was nice to know different tools to ease the documentation process
(I only used LaTeX before)
